<b>Stopień naukowy wykładowcy:</b> dr		<b>Imię i nazwisko wykładowcy:</b> Radosław Kurach		

**Wymagania wstępne (przedmioty wprowadzające):**

Microeconomics

**Program przedmiotu:**

1. Introduction to macroeconomics
2. Measuring the economy (SNA definitions)
3. Some important facts from the modern macroeconomic theory
4. Introduction to economic fluctuations - Keynesian cross model
4. IS-LM model and the effects of monetary and fiscal policy
5. AD-AS model and the effects of demand and supply shocks
6. Phillips curve and inflation expectations
7. Open economy – balance of payments, fixed and floating exchange rate regimes
8. Labour market
9. Price stability
10. Long run economic growth and its determinants
11. Topics in International Finance and Macroeconomics

**Metody dydaktyczne:**

Problem sets solving, in-class presentations, current macroeconomic events discussion.

**Cele przedmiotu:**

The macroeconomics classes are designed to revise and supplement the material of the lectures in the context of exercises handed out to the students in one-week advance. The classes also give students the chance to discuss, in a more informal way, the material of the course, raise their own questions, identify and overcome common problems.

**Warunki zaliczenia:**

Sound understanding of the economic issues discussed during the course, ability to argument rigorously using graphical and formal analysis, ability to manipulate the models introduced in the lectures. Students will be graded for the following tasks: in-class presentation, problem sets solving, written test.
